UHF Ethernet - Half Duplex Data Radio Modem

Crescendo is a series of digital data radio modems designed for use in large scale wide area point-to-point and point-to-multipoint industrial systems.

The radio provides a high-speed reliable link over narrow band channels for telemetry and SCADA radio applications requiring information or control of one or multiple remote stations.

The Ethernet version allows for:
- Transparent IP links using TCP/IP Gateway feature
- Fast polling facilitating low latency data streams and effective bandwidth utilisation
- Modbus over IP support

Features
- Frequency Range 380MHz – 520MHz
- 5 Watt transmit power (software selectable)
- 19,200 bps (or 9,600 bps) air data rate
- Multi-mode LED front panel display for diagnostics, including RSSI meter
- Forward Error Correction (FEC) for high link integrity in RF-noisy environments
- Windows-based GUI support for configuration and remote diagnostics
- Protocol addressing and routing support, DNP-3, Modbus and IEC 870 compatibility
- Store-and-forward repeaters for large-scale networks and coverage expansion
- Pseudo full-duplex operation with automatic repeat request (ARQ)
- Two RS-232 serial ports (main and auxiliary)
- Auto-negotiating 10BASE-T and 100BASE-TX Half and Full-duplex Ethernet
- Operating voltage 9 to 30 VDC
- I/O support (model specific)

Applications

The Crescendo series is suited for applications in Utilities, Mining, Agriculture and Transport industries where reliable long distance data transfer is critical.

The data radio can be used in small or large scale telemetry systems, with almost any PLC, RTU, HMI or DCS vendor for monitoring and control of critical assets.

Telemetry applications include distribution system monitoring, pump station and tank control, irrigation, fan and pressure control, and environmental monitoring.

The radios are also used in complex GPS systems for fleet tracking and management, and high precision correctional systems for machine control and automation.
Specifications

Switching Bandwidth
The user can select any 6.25kHz raster frequencies with the easy-to-use inbuilt menu or Windows configuration software.

Data Reliability
User selectable Automatic Repeat Request (ARQ) offers a high level of data reliability. The immediate re-transmission of data ensures that the user will not encounter end to end errors or data loss even in hostile environments.

Diagnostics at a Glance
The front panel LEDs display diagnostic information such as Receive Signal Strength (RSSI), transmit power, radio temperature and RS232 port status.

Data Mode Options
With data and frame-driven modes available, the Ethernet Crescendo supports point-to-point, point-to-multipoint, Hayes Dial-up and multiple modes of communication.

Easy Network Management
The user is able to view diagnostics and change the settings of other remote radios within a network from a single point.

Data Integrity
Over the air data is encapsulated with Forward Error Correction, data interleaving and Cyclic Redundancy Checksums (CRC) for high level data protection. This reduces the number of errors in each transmission.

Easy Network Configuration
The Cruise Control software allows the user to configure, save and upload radio configuration settings. This allows for numerous radios to be configured more efficiently.

GENERAL
**Operating Voltage:** 9V to 30V DC (negative ground)  
**Operating Current:**  - Transmit @12V 1.7A nominal @ 5W  
- Receive @12V 1A nominal  
**Operating Temp:** -10 to +60°C  
**Operating Humidity:** Up to 95% non-condensing relative humidity

RADIO
**Frequency Range:** 380 MHz to 520 MHz  
**Air Data Rate:** 19.2 kbps (25 kHz channel), 9.6 kbps (12.5 kHz channel)  
**Duty Cycle:** Up to 100%  
**Channel Bandwidth:** 12.5kHz or 25kHz (model specific)  
**Compliance:** Designed to ACA, ETSI (planned) and FCC  
**Modulation:** Nyquist-shaped 4-level FSK  
**TxA key up Time:** less than 1mS  
**Data Turn-around Time:** <10mS  
**Transmit Power:** 1.0mW (0dBm) to 5W  
**(+37dBm)**  
**Mode of Operation:** Single-port half duplex, Split-port half duplex
