Features

- Frequency Range 380MHz – 520MHz
- 5 Watt transmit power (software selectable)
- 19,200 bps (or 9,600 bps) air data rate
- Multi-mode LED front panel display for diagnostics, including RSSI meter
- Forward Error Correction (FEC) for high link integrity in RF-noisy environments
- Windows-based GUI support for configuration and remote diagnostics
- Protocol addressing and routing support, DNP-3, Modbus and IEC 870 compatibility
- Store-and-forward repeaters for large-scale networks and coverage expansion
- Pseudo full-duplex operation with automatic repeat request (ARQ)
- Two RS-232 serial ports (main and auxiliary)
- Auto-negotiating 10BASE-T and 100BASE-TX Half and Full-duplex Ethernet
- Operating voltage 9 to 30 VDC
- I/O support (model specific)

Applications

The Crescendo series is suited for applications in Utilities, Mining, Agriculture and Transport industries where reliable long distance data transfer is critical.

The data radio can be used in small or large scale telemetry systems, with almost any PLC, RTU, HMI or DCS vendor for monitoring and control of critical assets.

Telemetry applications include distribution system monitoring, pump station and tank control, irrigation, fan and pressure control, and environmental monitoring.

The radios are also used in complex GPS systems for fleet tracking and management, and high precision correctional systems for machine control and automation.
### Specifications

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Switching Bandwidth</strong></td>
<td>The user can select any 6.25kHz raster frequencies with the easy-to-use inbuilt menu or Windows configuration software.</td>
</tr>
<tr>
<td><strong>Data Reliability</strong></td>
<td>User selectable Automatic Repeat Request (ARQ) offers a high level of data reliability. The immediate re-transmission of data ensures that the user will not encounter end to end errors or data loss even in hostile environments.</td>
</tr>
<tr>
<td><strong>Diagnostics at a Glance</strong></td>
<td>The front panel LEDs display diagnostic information such as Receive Signal Strength (RSSI), transmit power, radio temperature and RS232 port status.</td>
</tr>
<tr>
<td><strong>Data Mode Options</strong></td>
<td>With data and frame-driven modes available, the Ethernet Crescendo supports point-to-point, point-to-multipoint, Hayes Dial-up and multiple modes of communication.</td>
</tr>
<tr>
<td><strong>Easy Network Management</strong></td>
<td>The user is able to view diagnostics and change the settings of other remote radios within a network from a single point.</td>
</tr>
<tr>
<td><strong>Data Integrity</strong></td>
<td>Over the air data is encapsulated with Forward Error Correction, data interleaving and Cyclic Redundancy Checksums (CRC) for high level data protection. This reduces the number of errors in each transmission.</td>
</tr>
<tr>
<td><strong>Easy Network Configuration</strong></td>
<td>The Cruise Control software allows the user to configure, save and upload radio configuration settings. This allows for numerous radios to be configured more efficiently.</td>
</tr>
</tbody>
</table>

#### PHYSICAL
- **Dimensions:** 188mm x 100mm x 42mm
- **Weight:** 800g
- **Construction:** Powder coated aluminium
- **MODEM**
  - **Serial Data:** RS-232 Asynchronous with handshaking
  - **Interface Speed:** 110bps to 115200bps software selectable
- **Error Rate:**
  - +10dBm for less than 1x10^-6 BER (9600bps)
  - +10dBm for less than 1x10^-6 BER (91200bps)

#### GENERAL
- **Operating Voltage:** 9V to 30V DC (negative ground)
- **Operating Current:**
  - Transmit @12V 1.7A nominal @ 5W
  - Receive @12V 1.1A nominal
- **Operating Temp:** -30 to +70°C (version available)
- **Operating Humidity:** Up to 95% non-condensing relative humidity

#### CONNNECTORS
- **Antenna:** BNC Female (50 Ohm), Dual BNC for Split Tx/Rx port option
- **Ethernet port:** RJ45 (Straight through)
- **Serial:** 2 x DB9 RS-232
- **Female Power:** Phoenix PH 1776508 (2 positions) Mating connector supplied

#### RADIO
- **Frequency Range:** 380 MHz to 520 MHz
- **Air Data Rate:** 19.2 kbps (25 kHz channel), 9.6 kbps (12.5 kHz channel)
- **Duty Cycle:** Up to 100%
- **Channel Bandwidth:** 12.5kHz or 25kHz (model specific)
- **Compliance:** Designed to ACA, ETSI (planned) and FCC
- **Modulation:** Nyquist-shaped 4-level FSK
- **Tx key up Time:** less than 1mS
- **Data Turn-around Time:** <10mS
- **Transmit Power:** 1.0mW (0dBm) to 5W (+37dBm)
- **Mode of Operation:** Single-port half duplex, Split-port half duplex

#### OPTIONS
- **RFL-450 HWHE:** Ethernet Enabled Crescendo UHF, Half Duplex, Wide Band, 19200bps
- **RFL-450 HNME:** Ethernet Enabled Crescendo UHF, Half Duplex, Narrow Band, 9600bps
- **RFL-450 SWHE:** Ethernet Enabled Crescendo UHF, Split Antenna Port, Half Duplex, Wide Band, 19200bps
- **RFL-450 SNME:** Ethernet Enabled Crescendo UHF, Split Antenna Port, Narrow Band, 9600bps
- **RFL-450 HWME:** Ethernet Enabled Allegro UHF, Half Duplex, Wide Band, 9600bps
